advice to the Federal  
Department of  
Transport

Role of industry in  
changing  
Government  
Direction

CVIAQ Technical &  
Regulatory Functions

Current Industry  
Issues

## Future Directions Future Directions Future Directions

Speakers on the night will be from Transport and Main Roads QLD Vehicle safety and Standards section and CVIAQ's Technical and Regulatory Manager John Samson. We also plan to have representatives from the Mackay Transport office present on the night.

The evenings topics will cover local regional and federal topics relating to our industry. Presentations will leave plenty of time for questions and discussion.

You need the information from this Seminar as the next 3 years will see great change in the way we all do business. The introduction of the National Heavy Vehicle Regulator has widespread ramifications for our members. The restructuring of the PBS system by the NTC as well as environmental factors and the ever growing road freight task make it difficult to get a clear picture of where we will all be in a few years.

This will have major effects on AIS Stations, Approved Persons for modifications, vehicle sales and for the training sector.

Join us at this seminar to hear where we are going and what you can expect in the future as well as what you can do to influence these events.

### Refreshments provided

## ITINERARY

5.30pm	<b>Attendee Registration</b>
5.40pm	<b>Refreshments</b>
5.50pm	<b>Opening P Woodland CVIAQ</b>
6.10pm	<b>TMR Speaker</b>
